

SP-TMJB 6" x 6" Junction Box

This handy bolt-on 6"x 6"x 4" Junction Box can be used in many different ways. It can be used simply as a junction box to give installers more room to make connections, connect Camera Surge Protectors inline, or even to nest a small POE Injector.

The outside faces can be used to mount IR Illuminators, Directional Antennas, small footprint cameras, Long Range Motion Detectors or other security devices that can fit on each 6"x 4" face.

The Conduit Fitting access holes are standard 3/4" electrical knockout size actual hole size = 1.125"), and any 3/4" Conduit fitting, Wire Gland or LiquidTite fitting can be installed (with a backer nut). These knockout sized holes come with weatherproof Heyco Knockout Hole Seals already installed.

Inside Dimensions are 5-3/4" (W) x 5-3/4" (L) x 3-3/4" (H)
