Heavy-Duty Keypad Pedestal with Integrated Overwatch Camera Mount

Built for durability and designed for smart access control, this rugged stanchion system delivers everything you need for secure entry points, all in one constructed package.

This rugged keypad stanchion is engineered for secure facility access and streamlined installation:

Standard with Camera: Comes equipped with the EnviroCams Micron-IR Pocket Dome 4K IP Security Camera for crystal-clear monitoring. Also available w/o camera.

Keypad Height: Positioned at 42 inches—optimal for drivers and pedestrian users alike

Dedicated Handhole Access: Makes installation and maintenance quick and clean, with direct hookup space for wiring and conduit

Overwatch Camera Shroud: Included 24-inches above the keypad, featuring a shrouded enclosure designed to house a surveillance camera for clear, overhead monitoring of access interactions

Construction: Durable 4' aluminum square pole, weather-resistant powder coating, and reinforced weld points ensure long-term reliability in harsh environments

IP-Rated Waterproof Connector

Each StrongPoles Keypad Pedestal includes a weather-sealed wiring gland at the base or below-ground section, designed to protect your connections from moisture, dust, and corrosion. This rugged connector allows for easy routing of multiple cables—such as CAT5/6 or power lines—while maintaining a watertight seal for long-term reliability in outdoor environments.

Ideal for gated entries, warehouse perimeters, and remote access points where secure verification and visual oversight are critical.

Available exclusively in Hammered Black.

Don't leave your perimeter unprotected or your access point vulnerable. This all-in-one keypad stanchion system isn't just a tool—it's a deterrent. Whether you're securing a gated community, industrial site, or commercial lot, it combines convenience, visibility, and surveillance into one sleek structure.

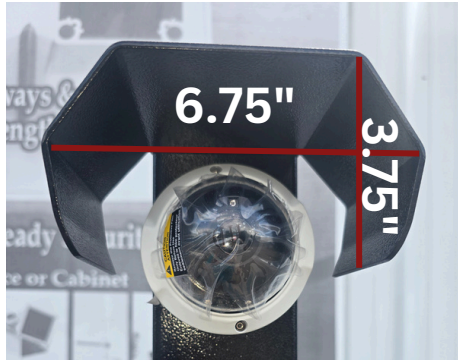

Made for tough environments. Designed for smarter security. Trusted by professionals.
