

FLY-OUT MOUNT

SP-PTMRFO

Ready for PTZs or Panoramic Box

Strong Poles has designed a mount for a PTZ Camera (1-1/2" NPT Threaded pipe) or to fit our Panoramic Camera Mounting Box, that is designed to hold any camera with a screw-on attachment. The size of the threads are 1-1/2" NPT, but a reducer can be used to fit other sizes as well as a Female Coupler.

Made from 1 1/2 inch Aluminum Pipe (1.9" OD), this stylish "Fly-Out" mount is designed to get the mounting arm a good distance away from the camera so that it does not block a large portion of the surrounding view.

The supplied 1-1/2" NPT pipe fits many common PTZ Cameras, Dome Cameras and Panoramic Cameras. It can also be easily adapted for others. This Fly-Out Mount can be combined with our Panoramic Camera Mounting box to provide a mount and drop-down service door for virtually any 360 or 180 degree Panoramic Camera.
