

8X8X16 "BIRDHOUSE" MOUNTING PLATFORM

SKU: SP-PTZEM16

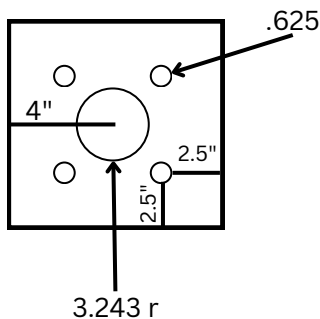

Available: in White and Dark Bronze

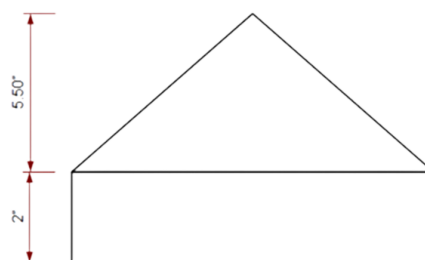

Designed to provide 4 long, wide mounting faces for large, heavy PTZ Cameras, Equipment Cabinets, Power Supplies, Transmitters and Antennas and a myriad of Security Detectors, Sensors and other Devices.

The Birdhouse can be mounted on to any of our SteadyMax Poles or 4" Strong Poles.

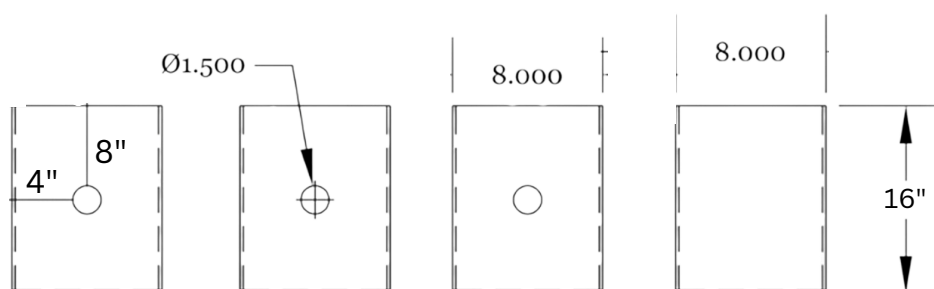

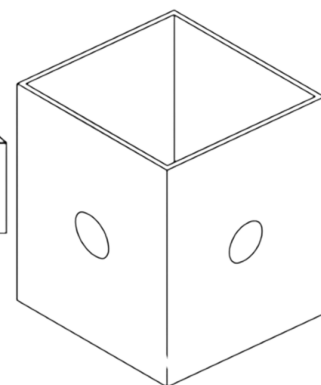

Bottom Mounting Plate

Will accept up to 4 1" Conduit Fitting on bottom side of platform

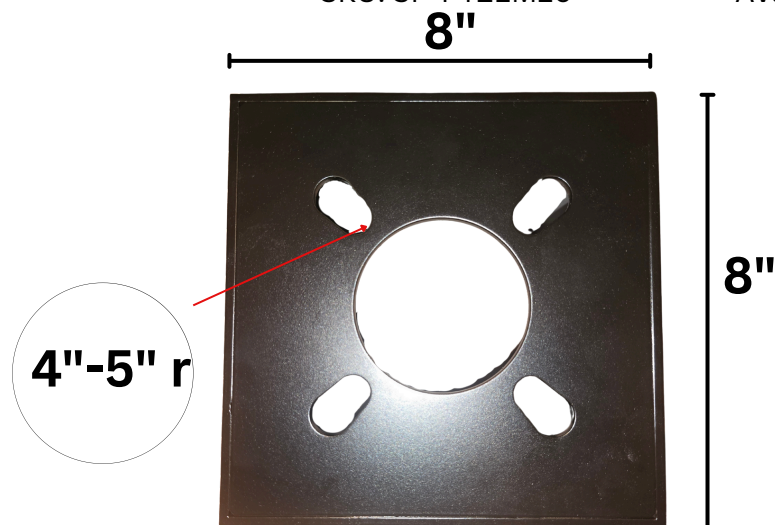

Inside Dimensions are 7-5/8" (W) x 7-5/8" (L) x 15-3/4" (H)

8X8X16 "BIRDHOUSE" MOUNTING PLATFORM

SKU: SP-PTZEM16

Available: in White and Dark Bronze

Bottom Plate

Birdhouse for StrongPoles Legacy & SteadyMax Poles

Step-by-Step Instructions

1. Align Birdhouse Bracket

- Position the bracket over the pre-tapered holes on the pole, pointing towards corners.
- Ensure flush contact to avoid stress on threads.

2. Add Washer

- Slide on a corner washer to resist vibration and loosening.
- Position the washer between the bolt head and birdhouse surface.

3. Insert Each Bolt into Pre-Threaded Hole

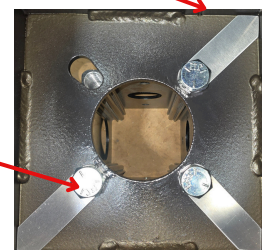

- Use the correct bolt type: $\frac{5}{8}$ "-11 x $1\frac{1}{2}$ "

4. Tighten with Socket

- Use: 1" socket for $\frac{5}{8}$ " Hex bolt for the 4" Legacy Pole and SteadyMax Pole.
- Tighten.

5. Final Inspection

- Confirm the bolt head sits flush and washers are properly seated.
- Check for any visible gaps—tight fit should deter bees/wasps without sealant.

Hex Bolts
