Fly-Out Mount

SP-PTMRFO

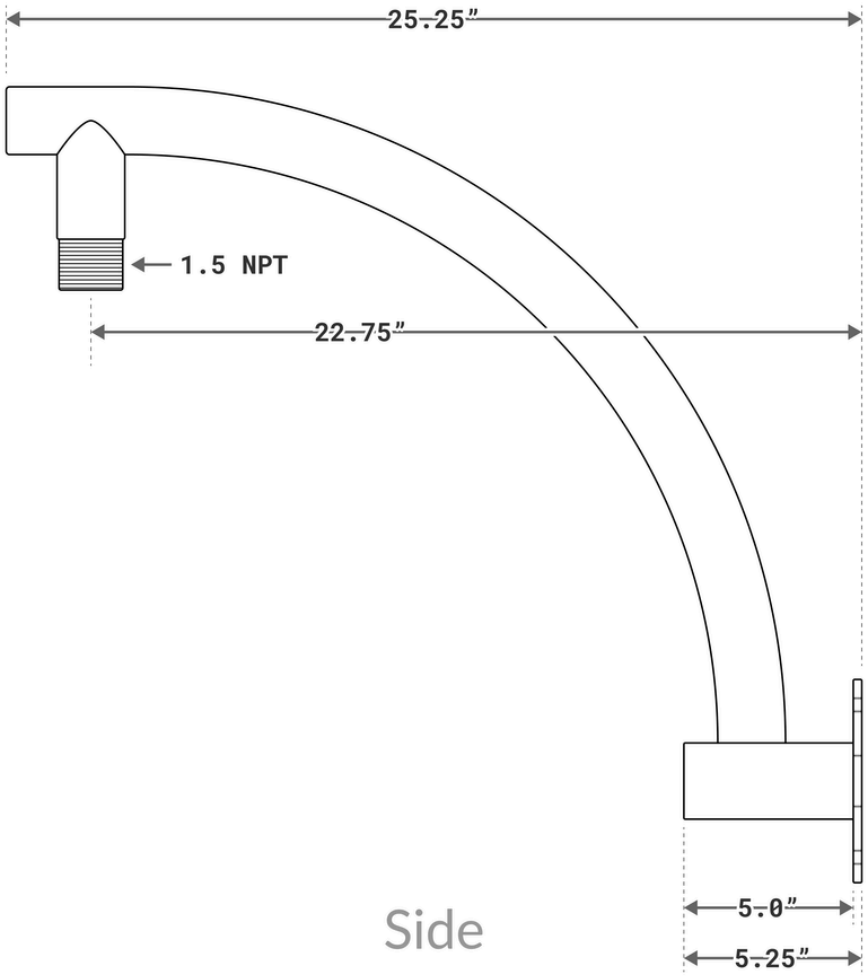

Strong Poles' Fly-Out Mount extends cameras away from the pole to maintain an unobstructed 360° or 180° field of view. Engineered with a standard 1-1/2” NPT threaded pipe, it natively fits most popular PTZ, dome, and panoramic cameras, and easily adapts to other sizes using female couplers or reducers.

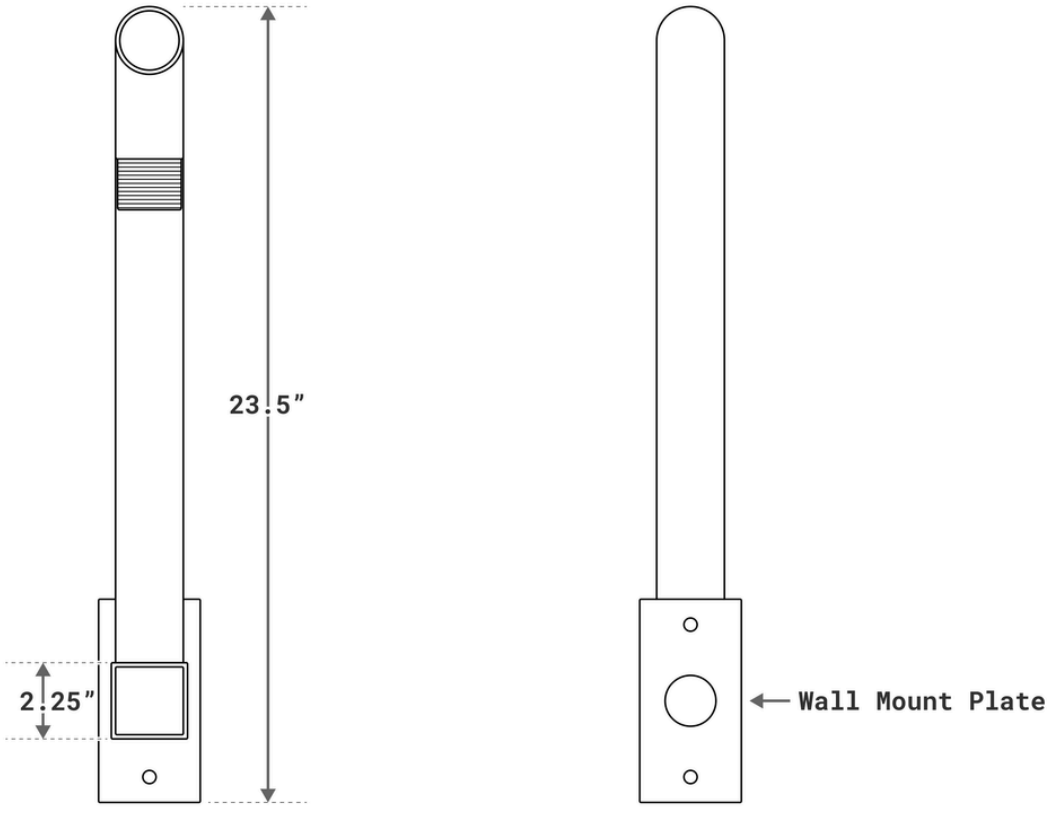

Features

- Extended reach keeps the mounting arm clear of the camera’s sightline to prevent blind spots.
- Standard 1-1/2” NPT male thread (1.9” OD aluminum pipe) is compatible with PTZ cameras, dome cameras, or adapters.
- Combines seamlessly with the Strong Poles Panoramic Mounting Box to add a drop-down service door for easy maintenance.
